**TIDAK MENERIMA SUAP, PUNGLI DAN GRATIFIKASI DALAM PELAKSANAAN TUGAS  
SESUAI KETENTUAN YANG BERLAKU**

- 1) Berdasarkan tabel diatas dapat diketahui jumlah populasi ternak awal bulan September adalah sebanyak 540 ekor dan pada akhir bulan September adalah sebanyak 539 ekor terdiri dari **198 ekor Donor** (Donor BET 178 ekor dan Donor impor 20 ekor), **139 ekor Resipien**, **152 ekor Ternak Muda** (33 ekor sapi jantan, 2 ekor kerbau jantan, 115 ekor sapi betina, dan 2 ekor kerbau betina), **50 ekor Anak** (21 ekor sapi jantan, 1 ekor kerbau jantan, 27 ekor sapi betina, dan 1 ekor kerbau betina).
- 2) Penambahan ternak pada bulan September diperoleh dari kelahiran ternak. Kelahiran ternak di bulan September sebanyak 4 ekor terdiri yang merupakan hasil IB. Realisasi kelahiran ternak sampai dengan bulan September sebanyak 67 ekor (83,75% dari total target kelahiran sebanyak 80 ekor).
- b. Pengeluaran ternak terdiri dari kematian ternak sebanyak 5 ekor terdiri dari 1 ekor donor, 2 ekor resipien, 1 ekor ternak muda dan anak lahir mati sebanyak 1 ekor.

## 2. Capaian produksi embrio

Program SOV Produksi pada Bulan September 2023 sebanyak 31 ekor dan menghasilkan embrio layak transfer sebanyak 135 embrio. Produksi embrio pada bulan September 2023 diperoleh dari produksi embrio insitu dan eksitu. Produksi embrio insitu sebanyak 22 SOV dan menghasilkan 82 dengan menggunakan 5 rumpun, yaitu FH (8 ekor, memperoleh 5 embrio), Simmental (8 ekor, memperoleh 49 embrio), Limousin (4 ekor, memperoleh 1 embrio), Brahman (1 ekor, memperoleh 25 embrio), dan Madura (1 ekor, memperoleh 2 embrio). Produksi embrio eksitu sebanyak 9 SOV dan menghasilkan 53 embrio dengan menggunakan 3 rumpun, yaitu FH (1 ekor, memperoleh 5 embrio), Limousin (3 ekor, memperoleh 4 embrio), dan Simmental (5 ekor, memperoleh 44 embrio). Total Program SOV dan Produksi Embrio layak transfer yang hasilkan s.d akhir Bulan September 2023 adalah 209 SOV dan 623 embrio (77,88%) dari target kinerja sebesar 800 embrio..

**Tabel 2. Produksi Embrio s.d 31 September 2023**

**b. Distribusi embrio dan lokasi**

Distribusi embrio pada bulan September berjumlah 232 embrio dengan jumlah daerah penerima sebanyak 2 Provinsi. Distribusi sampai dengan bulan September sebanyak 729 embrio atau 121,50 % dari target 600 embrio. Daerah penerima embrio bulan September adalah UPTD BPTSD Tuah sakato, BPTU HPT Padang Mangatas di provinsi Sumatera Barat serta BET Cipelang. Distribusi embrio ke wilayah kerja BET menggunakan embrio yang diproduksi oleh BET Cipelang (baik in situ maupun eksitu) embrio impor hanya digunakan di BET Cipelang dalam rangka pemenuhan replacement pejantan untuk B/BIB nasional dan daerah serta replacement donor.

**b. Ternak Bunting Bulan September 2023**

Pada awal bulan September jumlah ternak bunting IB sebanyak 17 ekor, TE sebanyak 6 ekor sehingga jumlah ternak bunting awal bulan September sebanyak 23 ekor. Pada bulan September telah dilakukan PKb dan diperoleh jumlah ternak bunting sebanyak 6 ekor, terdapat induk partus sebanyak 4 ekor, sehingga jumlah ternak bunting pada akhir September sebanyak 25 ekor terdiri dari 17 ekor bunting IB, dan 8 ekor bunting TE.

| 9  | September | 0              | 0      |
|    | Jumlah    | 24             | 24     |

## 8. Kinerja keuangan

### a. Realisasi APBN

b. Realisasi anggaran sebesar Rp. 25.453.613.255,- dari pagu Rp. 34.299.609.000 atau 74,21 %

### c. PNPB (fungsional dan umum)

Realisasi PNPB pada bulan September 2023 sebesar Rp. 1.093.200,- dengan rincian Pendapatan Fungsional : Rp. 340.000,-. Pendapatan Umum Rp.753.200,-, jumlah total sampai dengan bulan September Rp. 1.615.933.650,- (Pendapatan Fungsional : Rp. 356.339.650,- Pendapatan Umum Rp. 1.259.594.000,- dari target Pagu Rp. 1.006.167.000,- atau 160,60 %.

## 9. Kinerja pakan

### a. Produksi Hijauan Pakan Ternak (HPT)

Stok Hijauan Pakan Ternak (HPT) segar pada awal bulan September sebanyak 22.200 kg dan silase 5.830 kg. Produksi Hijauan Pakan Ternak pada bulan September sebanyak 408.590 kg yang berasal dari kebun BET 402.900 kg dan pengadaan rumput luar BET 5.690 kg dengan rata-rata produksi rumput per hari 13.620 kg. Total distribusi HPT dan silase selama bulan September sebanyak 404.460 kg dengan rata-rata distribusi per hari 13.482 kg. Penyusutan HPT selama bulan September sebanyak 3.330 kg (0,77%). Sehingga terdapat sisa stok HPT pada akhir bulan September sebanyak 24.000 kg dan silase 4.830 kg.

Produksi dan distribusi HPT sampai dengan bulan September secara rinci dapat dilihat pada tabel 12.

**Tabel 12. Produksi Hijauan Pakan Ternak sampai dengan 30 September 2023**

| Bulan     | Stok HPT Segar Awal Bulan (Kg) | Stok Silase Awal Bulan (Kg) | Produksi HPT (Kg) |         |           |                    | Produksi Silase | Distribusi (Kg) |        |           |                    | Penyusutan HPT Segar |      | Stok Akhir Bulan (Kg) |        |            |

**b. Pengadaan dan Produksi konsentrat**

1) Pengadaan bahan pakan konsentrat

Pengadaan bahan pakan dilakukan melalui proses e-purchasing. Sampai dengan Bulan September Realisasi Fisik Bahan Pakan adalah sebanyak 714.040 kg dari target 854.340 atau 83,58%

| No | Jenis Bahan Pakan      | Bahan Pakan Konsentrat Donor dan Pedet (Kg) |                          |                 | Bahan Pakan Konsentrat Resipien dan Calon Bibit (Kg) |                          |                 | Pengadaan Bahan Pakan Ternak Pedet (Kg) |                          |            |

Stok konsentrat awal bulan September sebanyak 5.850 kg. Produksi konsentrat pada bulan September sebanyak 75.000 kg sehingga total stok konsentrat pada bulan September sebanyak 80.850 kg yang terdiri dari Konsentrat Donor, Konsentrat Resipien, Konsentrat Pedet/ Muda dan Konsentrat Laktasi dengan rata-rata produksi per hari 2.500 kg. Distribusi konsentrat bulan September sebanyak 76.550 kg dengan rata-rata distribusi konsentrat per hari 2.552 Kg. Sehingga terdapat sisa stok konsentrat pada akhir bulan September sebanyak 4.300 Kg.

Produksi dan distribusi Konsentrat bulan September secara rinci dapat dilihat pada tabel 13.

**Tabel 13. Produksi Konsentrat sampai dengan 30 September 2023**

| Bulan        | Stok Awal Bulan (Kg) | Produksi (Kg)  | Rataan per Hari | Distribusi (Kg) | Rataan per Hari | Stok Akhir Bulan (Kg) |

c. Distribusi bibit HPT

| Bulan     | Distribusi(Stek) | Lokasi Distribusi | Jenis HPT    |
|-----------|------------------|-------------------|--------------|
| Januari   | 15.000           | Jasinga-Bogor     | Rumput gajah |
| Februari  | -                |                   |              |
| Maret     | 10.000           | Cianjur           | Rumput gajah |
| April     | -                |                   |              |
| Mei       | -                |                   |              |
| Juni      | -                |                   |              |
| Juli      | -                |                   |              |
| Agustus   | -                |                   |              |
| September | 200              | Boyolali          | Rumput gajah |
| Total     | 25.200           |                   |              |

Pada bulan September terdapat distribusi bibit HPT ( rumput gajah) sebanyak 200 stek sehingga total distribusi bibit HPT sampai akhir Bulan September sebanyak 25.200 stek.

## 10. Kesehatan ternak

Kegiatan medik dan paramedik pada bulan September antara lain pengobatan rutin harian, pengawasan status present ternak, pemberian vitamin ADE, pemotongan kuku dan tanduk, perawatan sapi pre dan post partus serta perawatan pedet pasca lahir.

**Tabel 14. Kasus Penyakit bulan September 2023**

| No | Kasus penyakit | Jumlah kasus | Penyebab              |
|----|----------------|--------------|-----------------------|

Diagram 1. Persentase kasus bulan September 2023

Kasus penyakit yang terjadi pada bulan September sebanyak 29 kasus. Kasus yang banyak terjadi pada bulan September yaitu diare dengan total 10 kasus. Kasus diare ini banyak terjadi pada pedet. Pengobatan diare tergantung pada penyebabnya, namun secara umum pengobatan dilakukan dengan cara kontrol status hidrasi dan elektrolit pasien, jika terdapat indikasi dehidrasi menengah sampai berat, maka dilakukan terapi cairan, pemberian antibiotik dilakukan jika sapi diindikasikan terinfeksi bakteri, dan obat-obatan suportif seperti vitamin, ATP, atau tonik hati diberikan untuk meningkatkan stamina sapi dengan tujuan mempercepat kesembuhan. Sebanyak 7 ekor sapi terserang Bovine Ephemeral Fever (BEF) yang merupakan penyakit yang banyak terjadi saat pergantian musim. Penyakit ini umumnya ditularkan melalui vektor nyamuk. BEF ditandai dengan adanya gejala demam, kurangnya nafsu makan, dan keluarnya cairan (serous) dari hidung. Penanganan penyakit ini adalah dengan pemberian analgesik ataupun antipiretik, serta pemberian vitamin untuk meningkatkan daya tahan tubuh sapi. Pada bulan September, terjadi 4 kasus kepincangan. Kepincangan dapat terjadi dikarenakan beberapa faktor, seperti adanya infeksi pada kuku (footrot) atau terjadinya trauma. Penganan dari kepincangan tergantung dari penyebab kepincangan, pada kepincangan yang diakibatkan oleh trauma, sapi diberikan analgesik dan antiradang dan melakukan pembersihan luka jika terdapat perlukaan. Sedangkan jika diakibatkan oleh infeksi, maka dilakukan pemotongan dan pembersihan kuku, dan melakukan *foot dipping*. Selain itu sapi juga diberikan analgesic, antiradang, dan vitamin secara parenteral.

**Tabel 15. Data Kematian Ternak**

| No            | Bulan     | Jumlah (ekor) | Rumpun                   | Status Ternak         | Jenis Kelamin  | Penyebab  |
|---------------|-----------|---------------|--------------------------|-----------------------|----------------|-----------|

## 11. Ketatausahaan

- Jumlah rincian pegawai per tanggal 30 September 2023 sebanyak 59 Pegawai Negeri Sipil.
- Pengembangan SDM
  - Menghadiri Undangan Pelepasan Kepala Balai di BBPMSOH Bogor, pada tanggal 1 September 2023. (Deasy Zamanti, S.Pt. M.Si., Ricky Nooraini Hendrarifah, A.Md. dan Ishak.)

- Memfasilitasi Penilaian Lapangan TE Award 2023 di Jawa Tengah, pada tanggal 3-5 September 2023. (, Drh. Oloan Parlindungan, MP. dan Fahrudin Darlian, S.Pt., M.Pt.)
- Mengadakan koordinasi Kegiatan di Pemadam Kebakaran di Cibinong, pada tanggal 4 September 2023. (Taufiq Imam Hidayat, A.Md. dan Ade Adji Anugrah Hakim A.Md).
- Memfasilitasi Penilaian Lapangan TE Award 2023 di Provinsi Jawa Timur, pada tanggal 4-6 September 2023. (Dr. Jakaria, SPt, MSc, Anny Rosmayanti S.Pt. dan drh. Weni Kurniati, M.Si.)
- Mengikuti Workshop Menghitung Nilai DS TA 2022 Lingkup Ditjen PKH dan Badan PPSDMP di Jakarta, pada tanggal 5 September 2023. (Deasy Zamanti, S.Pt. M.Si. dan Cecep Sastrawiludin, S.Pt.)
- Memfasilitasi Penilaian Lapangan TE Award 2023 di Provinsi Sumatera Barat pada tanggal 6-8 September 2023 (Ilyas, S.Pt., R. Radito Gariadjie, S.Pt. dan Doni Indra Gumelar, A.Md)
- Mengikuti Bimbingan Teknis Pengolahan Pupuk Kohe di BIB Lembang, pada tanggal 7-8 September 2023 (Candra Kurniawan dan Bunyamin)
- Pelatihan Asesor Kompetensi di BBPP Ketindan - Malang, Jawa timur, pada tanggal 9-16 September 2023. (Drh. Oloan Parlindungan, MP)
- Menghadiri Rapat Realisasi dan hambatan pelaksanaan program strategis Direktorat Jenderal Peternakan dan Kesehatan Hewan TA 2023 di Surabaya, pada tanggal 11-13 September 2023. (Deasy Zamanti, S.Pt. M.Si. dan Cecep Sastrawiludin, S.Pt)
- Mengikuti sosialisasi dan koordinasi kebijakan urusan perbendaharaan lingkup Ditjen PKH TA. 2023 di Yogyakarta, pada tanggal 13-15 September 2023. (Siti Darojah S.Pt., Mohamad Junaedi, S.Pt., Ricky Nooraini Hendrarifah, A.Md. dan Mohammad Azizillah, A.Md)
- Mengadakan *In House Training Penanggulangan Bencana* (penggunaan alat pemadam api ringan, *rescue* hewan liar dan pertolongan pertama pada kecelakaan kerja) bekerja sama dengan Dinas Pemadam Kebakaran Kab.Bogor di Balai Embrio Ternak Cipelang, pada tanggal 13 September 2023. (diikuti seluruh Pegawai)
- Evaluasi pelaksanaan anggaran triwulan III tahun 2023 di DJPB Bandung, pada tanggal 14 September 2023. (drh. Weni Kurniati, M.Si., Erlinawati Rismatul Solichah, S.Pt., Isnaini Putri Nastiti, S.Pt. dan Ishak)

- Mengikuti Seminar Genomic dengan tema Advanced Breeding Strategy di Bogor, pada tanggal 16 September 2023. (Anny Rosmayanti S.Pt., Edwar, S.Pt. dan Delia Stiatna S.Pt)
- Menghadiri Penyusunan Dokumen RKA-K/L TA. 2024 Lingkup UPT Ditjen Peternakan dan Kesehatan Hewan di Solo Jawa Tengah, pada tanggal 20-23 September 2023. (Deasy Zamanti, S.Pt., M.Si. dan drh. Weni Kurniati, M.Si)
- Mengikuti Bulan Bakti Peternakan dan Penganugerahan TE Award 2023 di Boyolali - Jawa Tengah, pada tanggal 20-23 September 2023. (Deasy Zamanti, S.Pt. M.Si., Sri Wahyuni Siswanti, S.Pt. M.Si., Fahrudin Darlian, S.Pt., M.Pt., Cecep Sastrawiludin, S.Pt., Septaria Jodiansyah, S.Pt., R. Radito Gariadjie, S.Pt., Deni Hardiansyah, S.Pt., Mohamad Junaedi, S.Pt., Ricky Nooraini Hendrarifah, A.Md., Doni Indra Gumelar, A.Md., Mohammad Azizillah, A.Md., Aep Saepuloh, A.Md., Ade Adji Anugrah Hakim, A.Md. dan Riki Hardi)
- Mengikuti kegiatan sosialisasi pemeringkatan keterbukaan informasi publik lingkup Kementerian Pertanian Tahun 2023 di Bogor, pada tanggal 25 September 2023. (Sri Wahyuni Siswanti, S.Pt. M.Si. dan Rizqi Amaliah Hafiz, A.Md)
- Mengikuti kegiatan sosialisasi tata cara monitoring kualitas data ILaporan keuangan dan rekonsiliasi berdasarkan PER-8/PB/2023 di KPPN Bogor, pada tanggal 26 September 2023. (Sasmita Miharja, S.ST. dan Mohamad Junaedi, S.Pt)
- Mengikuti koordinasi kegiatan penanganan mulut dan kuku (PMK) Wilayah Kerja Balai Veteriner Subang tahun 2023 di Bandung, pada tanggal 26-27 September 2023. (drh. Weni Kurniati, M.Si)

Demikian laporan bulan September kami sampaikan. Atas perhatian dan kerjasama Bapak/Ibu kami ucapkan terima kasih.

Tembusan :

1. Direktur Jenderal Peternakan dan Kesehatan Hewan
2. Direktur Perbibitan dan Produksi Ternak
3. Direktur Kesehatan Hewan
4. Direktur Pakan
